FOR IMMEDIATE RELEASE

#339

WASHINGTON, D.C. Jan. 28 -- Members of the Department of Housing and Urban Development today agreed to meet with city officials of Galena, Kansas at HUD regional offices in Fort Worth, Tex., to review the city's need for funds to develop its water and sewage project.

HUD officials and Congressman Joe Skubitz met in U.S. Senator Bob Dole's office today to discuss the city's problems.

Since beginning the project eight years ago, Galena has developed a municipal water supply and a sewage treatment plant. Additional funds are now needed to complete the installation of sewage pipe as planned in the original project.
