THROCKMORTON IN LINE FOR \$1.08 MILLION;  
COMPLETES KSU PLANT SCIENCE RESEARCH CENTER

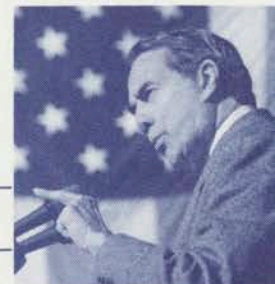

WASHINGTON - Kansas Senator Bob Dole announced today conference committee approval to fund the Throckmorton Plant Science Research Center at Kansas State University. The joint House/Senate Conference Committee included \$1.08 million in the Agriculture Appropriations bill for the coming fiscal year to fund the final federal portion of the project. The measure will now go before both the House and Senate for final approval before being forwarded to the President for his signature.

"Throckmorton is a state-of-the-art agriculture research center that is becoming an excellent national resource. I look forward to final Congressional approval of this important project. Kansas State University continues to excel with its strong commitment to agricultural research," said Dole.

Ground breaking for the project took place on April 4, 1992. Completion is scheduled for the fall of 1994. The \$1.08 million will complete the federal commitment to the project. The state of Kansas will provide a total of \$6.796 million for the project. Another \$5 million will come from private sources.
