FOR IMMEDIATE RELEASE

WASHINGTON, D.C., JANUARY 20, 1972 -- U.S. Senator Bob Dole along with Senator Jim Pearson and Congressman Larry Winn announced today that the Environmental Protection Agency has rented a building at 25 Funston St. in Kansas City, Kansas to be used as a "multi-purpose laboratory" for the next 15 years.

The building, containing 20,954 square feet, will do research in methods to eliminate or reduce air pollution, water pollution, solid waste disposal and pollution caused by radiation.

Dole said, "This laboratory, located in Kansas City, Kansas, will provided a facility where the EPA can work for the betterment of the enviroment of Kansas. This will directly benefit every member of the community. I am pleased that EPA chose Kansas City for this important program."
