**DOLE APPOINTS KANSAN TO RISK ASSESSMENT
AND MANAGEMENT COMMISSION**

WASHINGTON -- Republican Leader Bob Dole (R-KS) today announced the appointment of Dr. John Doull, of Overland Park, to the Risk Assessment and Management Commission, a federal panel created in the 1990 Clean Air Act.

"Dr. Doull brings tremendous credentials and Kansas common sense to this important Commission. His lifelong commitment to fighting causes of cancer will be a real asset to this panel and to the President," Dole said.

Dr. Doull has been with the University of Kansas Medical Center Department of Pharmacology, Toxicology and Therapeutics for over twenty-five years. He has served on a variety of boards and commissions relating to health and the environment and has written extensively on the subject as well.

The Commission will make a full investigation of the policy implications and appropriate uses of risk assessment and risk management in regulatory programs under various Federal laws to prevent cancer and other chronic human health effects which may result from exposure to hazardous substances.
