HIGH-TECH LASER RESEARCH FACILITY WINS FUNDING BREAKTHROUGH -  
GARDEN CITY STILL CANDIDATE  
FOR \$211 MILLION OUTER SPACE PROJECT

WASHINGTON - Senate Republican Leader Bob Dole (R-Ks) announced today that the Senate Appropriations Committee has agreed with his request of \$23.5 for the Laser Interferometer Gravitational Wave Observatory (LIGO), a high-tech outer space monitoring facility.

Garden City is a finalist in the competition with 18 other cities to be the home of this \$211 million project. The committee completed action on the FY 1992 Veterans Administration, Housing and Urban Development, and Independent Agencies Appropriations bill.

"Garden City is making a strong bid to bring this 21st century technology to Kansas. The Garden City Chamber of Commerce deserves a lot of credit for its determination and an excellent proposal. Today's funding gives the observatory a giant leap forward, and will heat up the competition. I will continue to work with Garden City officials, the scientific community and my colleagues on Capitol Hill to make certain Kansas gets its best shot at winning this tough competition," said Dole.

LIGO will be funded through the National Science Foundation.
