DOLE APPOINTS KANSAN TO TRANSPORTATION PANEL

WASHINGTON - Kansas Senator Bob Dole today announced his appointment of Thomas E. Mulinazzi of Lawrence to be a member of the National Council on Surface Transportation Research.

The seven-member council was established by Congress to study current surface transportation research efforts and technology developments in the United States and abroad, and to propose a national surface transportation research and development plan for immediate implementation.

"Transportation will be one of our priority issues as America approaches the 21st Century," Dole said. "Professor Mulinazzi will be an outstanding addition to this panel, and I'm confident he will represent the needs of rural America as new high-tech transportation modes are developed. Kansas and other rural states have to be part of national transportation policy, as well as our urban friends. I look forward to hearing Professor Mulinazzi's views."

Dr. Mulinazzi is the Associate Dean of Engineering at the University of Kansas, where he has been a member of the faculty since 1979. He served previously on the faculty of the University of Maryland.

Dr. Mulinazzi received a Bachelor of Science from the University of Notre Dame and holds a Masters Degree and a Doctorate in Transportation from Purdue University. He and his wife, Kathryn, have three children.
