

Paola Kansas July 24

My Dear Bob -

a note from Mrs Finney yesterday said you are doing fine - and I know you will continue the rapid improvement she says you are making - for so many prayers never go unanswered - I want to go over again to see you - when you are stronger - and we can have a long visit.

I'm wondering if that small room of yours isn't plenty warm these hot days - Looked to me as if that hospital needed some trees around it - but guess they can procure electric fans quicker than they can grow trees -

Now honey dont get in too big a hurry to go home -

The Government owes you everything

✓ they can give you - and are probably better equipped with surgeons and nurses - to give you every care your case demands - far better than you could possibly get at home -

I hope you will soon be - if you not already able to read - or be read to - for history is being made rapidly these days - So far in the "big three" conference at Potsdam - I must say Truman has acquitted himself so far - in a very alert and business like manner - and I earnestly hope he will be able to hold his own - for Stalin and Churchill went prepared to eat him alive without salt -

The morning papers - seem quite sure Hitler and his gal friend have landed safely in Patagonia -

3/ If you ~~and~~ your
buddies could have done to
him what they did to you - !!!
Has your mother gone home -
Its so nice she can be with
you so much.

Suppose you know Bob Ottison
is married. He and Thousands
like him are probably being
shipped to Pacific now.

I have the house all closed and
shady and fans going - and settled
down to write a number of
letters - and have made yours
first - in the event - some thing
happened to prevent my finishing
all of them -

With love and all good wishes
for your continued improvement.

Affectionately

Nellie B Griffith
