Dear Bob:

I didn't write last time honey - because for some reason or another I didn't feel so good after I had eaten my supper - Daddy didn't either - I guess it was the same reason - we had a letter from Gloria & one from N.J. - also enclosed in Gloria's letter was a page of scribbling from Larry Ray - I'll send them to you - I know you'll be glad to hear from them you can send them on to Kenney if you feel like it - I certainly hope by now you're beginning to feel better - of course I know how it is, with one arm in a splint or what - love you & your wife one at a time - it's probably hard for you to write & besides ~~much~~ more than that you probably don't feel like writing - but just keep your chin up son - you'll be alright soon & back to the States I hope - & soon - maybe you'll be like this Cyllington Boy - he had thirty days & was to spend that much time at home & return to Fitzsimmons Hospital in Denver - upon returning the hospital was full so they extended his stay thirty days - he probably is getting along alright & is just as well off here as any where I. Bob do you remember Mr. Wilmet - he lived across the st - anyway he was killed in Germany - he left a wife & three babies - they were terribly hard up - and it surely is too bad - I went to Club today once to Pell's - had pretty good cards - but couldn't bore the prize as I have had it twice this time around & that is all were allowed to have it during one time around the Club - this gives all a chance at it - Do you love any cards in which to play with it with realite to play a little bridge & pass away some time - what do you think - or can you use your arm that much - here I go again until

Daddy got homesick for Larry Ray, & called Gloria the other night they were moving into a little cabin - she said Larry Ray was really having a time exploring everything - he seemed to sense they were in a new place Gloria says he seems to understand something is wrong when she mentions you being hurt -

We certainly loving the damndest weather it is really cold - & nothing grows well - its just too cold & rainy - they said it was snowing in Nebraska - Mrs. Branson brought Betty's baby to club today he even looks like Betty I think he was real good tho. Frank Branson thinks his O.K. we had some pictures Gloria sent to us & told us to send on to Renney said she had sent you a set - most of them were taken while we were in L.A. - on enroute home from there some were taken in the Park at your a air.

~~Renney~~ Ruff called today & said she had a letter from Eugene today saying he & you had finally gotten together & had quite a visit - that of course was before your accident & the first thing I did was to have Eda and Eugene your Hospital address as I thought he could look you up - as he may be coming home soon & could tell us just how you are getting along. also he mite write to us & tell us all about you - We haven't heard from Renney since I wrote to you last & sent his letter - will let you know as soon as I can hear from him - so don't worry - at least he's going to a Bee as -

it isn't like he was going to invade some Island - they heard from Chet & he was being sent to a neat Camp - that Australia - of course only guessing - also Bobby James still in the Hospital - but able to be up & about - they're just getting him rested up to see if he can finish his missions - the last we heard of Bud's - he had completed several missions - Well son

so much for this - I hope this finds you feeling much better & able to be about - Good Luck & God bless - Love - Mom -
